

Project title: Project Giggle (AI Humor Generation)

Objectives

- Generate High-Quality Humor: Produce jokes that achieve a 4/5 "Hilarity Score" in blind human testing.
- Diverse Humor Archetypes: Develop the ability to generate different styles (e.g., wordplay, observational, satirical, and situational).
- Contextual Relevance: Ensure the LLM can generate humor based on specific user prompts or trending topics.
- Safety & Bias Mitigation: Ensure humor remains within Microsoft's Responsible AI guidelines.

People

- Jane Doe: Microsoft Project Sponsor (j.doe@microsoft.com).
- John Smith: Freelance Software Engineer & Project Lead (john.smith@example.com).
- Dr. Alan Turing: Internal Microsoft AI Ethics Reviewer.
